- b. **Managing Natural Open Spaces-** Mr. Gaines explained that The Clean Water Act controls non-point sources and regulates pollutant discharges into waters of the United States. Basins collect nutrients and help to filter the water before entering streams. The Township engineer has selected four basins that should be naturalized as part of a five-year plan. Fortunately, the WEAC has been naturalizing basins for many years, so the Township is already 80 % complete, under this plan. Ms. Ross spoke with Mr. Rieder and

Mr. Lubber concerning the large amount of maintenance needed on these basins, after they are planted. The Township has agreed that Public Works will work under the direction of the WEAC to maintain these four basins going forward.

- c. **Upcoming Tree Vitalize Grant-** Ms. Ross explained that the deadline for the upcoming Tree Vitalize grant is due in December 2017. A meeting with the Bucks County Conservation district to field view the four proposed basins is set up for September 12, 2017.

At the request of Mr. Suffian, Ms. Laurelli is creating a handout titled “Best Native Plants for Backyard Gardening”. Ms. Laurelli is using an article entitled “Gardening For Life”, by Doug Tallamy, as an example. This research discusses how to sustain birds and insects.

Mr. Gaines recommended putting together a list of Native Plants that would thrive in our area, as a handout.

Ms. Brown asked the committee if they wanted her to see if she could get the trees from Bartlett Tree Experts to give away again this year. Everyone was in favor of getting those trees for give a ways. Ms. Brown will follow up with Bartlett Tree Experts.
