Re: Water Meter Installation for Irrigation System

Dear Homeowner:

Warrington Township offers residents the opportunity to have a second water meter installed for an irrigation system. Water and sewer bills are based on the number of gallons of water used per quarter. You will receive a second bill for just the water use on your irrigation meter and sewer will not be billed on that usage.

The cost of the water meter is \$360.00 and can be paid for in full or in three (3) installments. An approved meter setting must be in place and then an appointment made for the Water and Sewer Department to install the meter.

Please call the Warrington Township Water/Sewer Department for specifications for the meter setting, make payment arrangements and schedule an appointment for installation.

Thank you for your cooperation.
